

## easy WMS WMS FOR 3PL

Simplify and improve management with your customers

This Easy WMS module features **solutions for logistics providers**, facilitating decision-making regarding storage, picking and order shipping for their clients. To do this, it employs several functionalities: 3PL Client Portal, 3PL Billing and Client-Specific Rules.

**3PL Client Portal** offers logistics service providers' clients remote access to the warehouse management system (WMS), allowing them to monitor the status of their stock in real time. Additionally, it eliminates manual communication processes between logistics providers and their clients, automatically notifying clients of any changes in the status of their stock via email, SMS or pop-up in the WMS interface.

The **3PL Billing** functionality enables 3PL providers to record and quantify the logistics activities they carry out for subsequent invoicing to their clients.

**Client-Specific Rules** allows for fast, easy customisation of warehouse logistics processes based on the specific requirements of each stock owner or end customer.

### BENEFITS OF WMS FOR 3PL

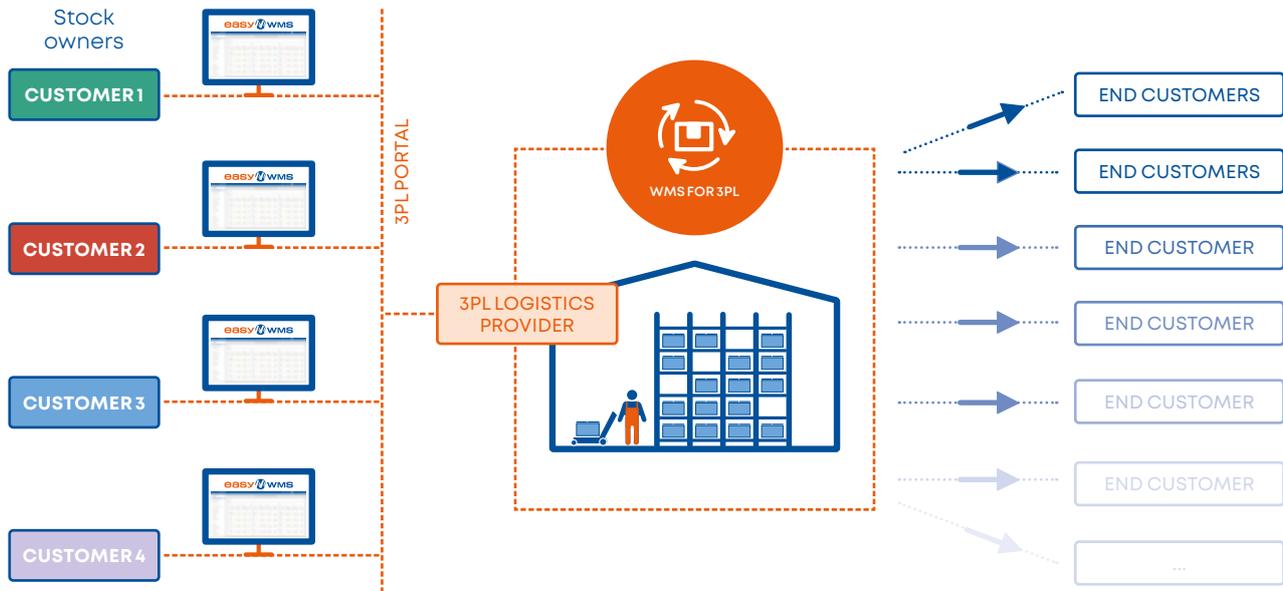

**Optimises relationships between logistics providers and their clients** by providing transparent and secure access to information on the stock they own

**Reduces costs** and streamlines processes, avoiding information loss

**Enhances customer service** and the services provided to different clients

Facilitates the **adaptation of warehouse processes** to changing logistics demands

## THE BEST LOGISTICS SERVICE FOR CUSTOMERS OF 3PL PROVIDERS

### 3PL Portal capabilities

- Direct interaction between logistics providers and stock owners via the Easy WMS interface
- Stock filtered according to different logistics attributes
- Customised views of Easy WMS for each customer
- Immediate notification to customers of events associated with the various logistics activities in the warehouse
- Monitoring of activities through dashboards and key performance indicators (KPIs)

### 3PL Billing capabilities

- Quantification and optimisation of logistics activities
- Automatic recording and accounting of all tasks performed in the warehouse
- Identification of the client associated with these activities for individualised invoicing

### Client-Specific Rules capabilities

- Quick, simple customisation of logistics processes based on 3PL client requirements
- Configuration and adaptation of warehouse processes to the specific needs of each customer or stock owner
- Assignment of each activity to the corresponding customer to generate a billing report with the services rendered

### Why choose Mecalux Software Solutions?

The company has 55+ years of experience in warehousing solutions and a presence in over 70 countries.

More than 400 engineers are exclusively dedicated to the development of logistics and supply chain software.

More than 1,000 facilities in 36 countries are managed by Mecalux software solutions.

Software is continuously developed and updated, thanks to major investments in R&D.

Technical support is available in multiple languages 24 hours, 365 days a year.
